

Preliminary plan for RAG activities Skane University Hospital

Daina Selga

RAG workshop Skane University Hospital

- Pilot project with two departments; management teams, coworkers

Day 1

- Safety 2 – repetition from previous seminars
- Presentation of the RAG model
- **Work with questionnaire;** Which questions should be asked to map each ability? Who should be interviewed? How should results be put together and presented?

“Homework”

- Work with questionnaire

Day 2

- Discussion questionnaire

“Homework”

- Each unit/ward working with interviews: staff and patients
- Time: approximately 2 months

Day 3

- Presentation of results
- Evaluation of results, problems
- Adjustments in questionnaire

Follow-up (after 4-6 months)

- Evaluation of how the RAG activities has influenced work at the department
- Adjustments of questionnaire

Evaluation of pilot project

- Were the right questions asked in the RAG questionnaire?
- Can the same questions be used in other departments at the hospital/primary care units?
- How to evaluate results
- How often should RAG analysis be performed?
